I think XM providing Traffic and weather is a great thing. We choose to PAY for this service to get away from all the commercial advertising. I don't see why we cannot have the choice to either pay for this service without having all the commercial advertising or get this service for free and listen to all that advertising. The number 1 reason I switched to Paying for my music is because I listen to the radio for MUSIC not Blah, Blah, Blah! I turn on the radio to soothe my nerves not listen to someone screaming their head off trying to get me to buy something. The bottom line is that "important information" like Traffic and weather should be broadcasted on Satellite radio. I respectfully URGE the FCC to reject the NAB's Petition 04-160. I don't think that XM is overstepping any boundries. They're just providing their customers with Good, Quality service. I respect XM's ability to provide the kind of programming that I demand and deserve.
